INTRODUCTION

FEBS Letters is a world-renowned journal for rapid publication of short reports describing novel and specific effects with a biologically or biochemically significant function. Bringing together the most important developments in the molecular biosciences, *FEBS Letters* provides an international forum for Research Letters, Reviews and Hypotheses describing or discussing mechanistic insights at the molecular level, which would be interesting to a broad readership. *FEBS Letters* is published by Elsevier on behalf of the *Federation of European Biochemical Societies (FEBS)*.

Aims, scope and subject coverage

Papers should be short but complete and essentially final reports. The subject area of *FEBS Letters* is broad. It covers biochemistry (protein chemistry, enzymology, nucleic acid chemistry, metabolism, and immunochemistry), molecular biology, molecular cell biology (signal transduction, intracellular traffic, regulation of cellular proliferation, cell-cell interactions), structural biology, biophysics, computational biology (genomics, proteomics, bioinformatics), molecular genetics and systems biology.

As a general policy, *FEBS Letters* does not consider preliminary or fragmentary observations, cloning and sequencing of cDNA or genes that have previously been reported for other species, conventionally achieved expression or crystallization of proteins, correlative studies or negative observations. Moreover, methodological papers are considered for publication only when they are truly novel and significant, and interesting to a broad readership.

BEFORE YOU BEGIN

Fast-Track Publication

FEBS Letters offers expedited handling of manuscripts that have been rejected from high-level journals. The submission should enclose reviews, comments from the editor, and the final decision letter. You will receive a decision from the Managing Editor and the Editorial Office within a few days of submitting your manuscript.

Policy and ethics

The work described in your article must have been carried out in accordance with *The Code of Ethics of the World Medical Association (Declaration of Helsinki)* for experiments involving humans <http://www.wma.net/en/30publications/10policies/b3/index.html>, *EU Directive 2010/63/EU for animal experiments* http://ec.europa.eu/environment/chemicals/lab_animals/legislation_en.htm, *Uniform Requirements for manuscripts submitted to Biomedical journals* <http://www.icmje.org>. This must be stated at an appropriate point in the article.

For information on Ethics in publishing and Ethical guidelines for journal publication see <http://www.elsevier.com/publishingethics> and <http://www.elsevier.com/ethicalguidelines>.

Conflict of interest

All authors are requested to disclose any actual or potential conflict of interest including any financial, personal or other relationships with other people or organizations within three years of beginning the submitted work that could inappropriately influence, or be perceived to influence, their work. See also <http://www.elsevier.com/conflictsofinterest>.

Submission declaration and verification

Submission of an article implies that the work described has not been published previously (except in the form of an abstract or as part of a published lecture or academic thesis), that it is not under consideration for publication elsewhere, that its publication is approved by all authors and tacitly or explicitly by the responsible authorities where the work was carried out, and that, if accepted, it will not be published elsewhere in the same form, in English or in any other language, including electronically without the written consent of the copyright holder. To verify originality, articles are routinely checked by the originality detection software *iThenticate*. See also <http://www.elsevier.com/editors/plagdetect>.

Authorship

All authors should have made substantial contributions to all of the following: (1) the conception and design of the study, or acquisition of data, or analysis and interpretation of data, (2) drafting the article or revising it critically for important intellectual content, (3) final approval of the version to be submitted.

Author Contributions

Detailed information about the specific contributions of every author should be provided. Please list all authors with their initials.

Example of Author Contributions statement:

AB and DJ conceived and supervised the study; AB and KL designed experiments; KL, DG and DGN performed experiments; AG provided new tools and reagents; KG developed new software and performed simulation studies; KL and DGN analyzed data; KL, AB and DJ wrote the manuscript; KL and AB made manuscript revisions

Role of the funding source

You are requested to identify who provided financial support for the conduct of the research and/or preparation of the article and to briefly describe the role of the sponsor(s), if any, in study design; in the collection, analysis and interpretation of data; in the writing of the report; and in the decision to

submit the article for publication. If the funding source(s) had no such involvement then this should be stated. Please see: <http://www.elsevier.com/funding>.

Open access options

FEBS Letters follows a subscription-based model with a delayed and hybrid open access policy. All articles are made available to non-subscribers for free after 12 months, with Review articles being available for free immediately. Additionally, *FEBS Letters* offers authors the option to sponsor non-subscriber access to their articles on Elsevier's electronic publishing platforms. Authors can only select this option after receiving notification that their article has been accepted for publication. This prevents a potential conflict of interest where *FEBS Letters* would have a financial incentive to accept an article.

The author charge for article sponsorship is 2,200 USD. This charge is necessary to offset publishing costs: from managing article submission and peer review, to typesetting, tagging and indexing of articles, hosting articles on dedicated servers, supporting sales and marketing costs to ensure global dissemination via *ScienceDirect*, and permanently preserving the published journal article.

Authors who have had their article accepted and who wish to sponsor their article to make it available to non-subscribers should complete and submit the order form:
http://www.elsevier.com/framework_authors/Sponsoredarticles/sponsoredarticleoption.pdf.

Funding body agreements and policies

Elsevier has a track record of working on behalf of our authors to ensure that authors can always publish in Elsevier journals and still comply with archiving conditions defined in research grant awards. For information on specific funding bodies, please see:
<http://www.elsevier.com/fundingbodies>.

MANUSCRIPT PREPARATION

Manuscript preparation is crucial for the success of your article. Along with evaluating the novelty and technical quality of your results, the editor and reviewers judge your manuscript based on language, overall clarity and intelligibility. Poorly and sloppily written articles, as well as spelling and grammatical mistakes, may ultimately lead to the rejection of your article, even though the scientific quality would warrant publication.

New submissions

Submission to this journal proceeds totally online and you will be guided stepwise through the creation and uploading of your files. The system automatically converts your files to a single PDF file, which is used in the peer-review process.

Your Paper, Your Way

As part of the 'Your Paper, Your Way' service, you may choose to submit your manuscript as a single file to be used in the refereeing process. This can be a PDF file or a Word document, in any format or layout that can be used by referees to evaluate your manuscript. It should contain high enough quality figures for refereeing. If you prefer to do so, you may still provide all or some of the source files at the initial submission.

There are no strict requirements on reference formatting. References can be in any style or format as long as the style is consistent. Author(s) name(s), journal title / book title, article title, year of publication, volume & issue / book chapter and the pagination must be present. The reference style required by the journal will be applied to the published version by Elsevier.

There are no strict formatting requirements but all manuscripts must contain the essential elements needed to convey your manuscript, for example Title, Author names and affiliations, Abstract, Keywords, Introduction, Materials and Methods, Results, Conclusions, Figures and Tables with Captions.

If your article includes any Videos and/or other Supplementary material, this should be included in your initial submission for peer review purposes.

Please note that the Cover letter should be uploaded as a separate file.

Revised submissions

It is important that the files are saved in the native format of the word processor used. Keep the layout of the text as simple as possible. The electronic text should be prepared in a way very similar to that of conventional manuscripts (see also the Guide to Publishing with Elsevier: <http://www.elsevier.com/guidepublication>). See also the section on Electronic artwork. To avoid unnecessary errors you are strongly advised to use the 'spell-check' and 'grammar-check' functions of your word processor. Revised submissions should contain the source files of the manuscript text, tables and figures as detailed below.

Article structure

Title Page and Abstract

Title

The title should be a maximum of 150 characters (including spaces). *FEBS Letters* reserves the right to edit titles for length and clarity.

Author names and affiliations

The full names and affiliations should be provided for all authors. The corresponding author should also provide a full postal address, telephone and fax number (including country code), and an e-mail address.

Abstract

The abstract should be a maximum of 100 words. The abstract should state the purpose of the research, the principal results and major conclusions. Avoid non-standard or uncommon abbreviations and formulae where possible. *FEBS Letters* reserves the right to edit abstracts for length and clarity.

Keywords

The keywords should reflect the significant factors of the investigation as a whole. A maximum of six keywords should be included.

Abbreviations

Define non-standard or uncommon abbreviations.

Highlights

Highlights consist of a short collection of bullet points that convey the core findings of the article. Please include 3 to 5 bullet points (maximum 85 characters (including spaces) per bullet point). See <http://www.elsevier.com/highlights> for examples.

Manuscript text

The length of the submitted manuscript should not exceed 3000 words, excluding figure legends, tables, and references. Editors will accept longer papers only when there are compelling reasons to do so. Ideally, the manuscript text should be divided in the following sections:

Introduction

Materials and Methods

*Results*¹

*Discussion*¹

Acknowledgements

References

Figure legends

References

The number and length of references is not limited. *FEBS Letters* strongly encourages citation of primary literature in favour of reviews where appropriate. There are no strict requirements on reference formatting. References can be in any style or format as long as the style is consistent. Author(s) name(s), journal title / book title, article title, year of publication, volume & issue / book chapter and the pagination must be present. The reference style required by the journal will be applied to the published version by Elsevier.

Unpublished results and personal communications are not recommended in the reference list, but may be mentioned in the text. Citation of a reference as 'in press' implies that the item has been accepted for publication.

¹ the Results and Discussion can be combined in one section

Tables

Number tables consecutively in accordance with their appearance in the text. Place footnotes to tables below the table body and indicate them with superscript lowercase letters.

Tables may be included in the manuscript file upon initial submission. For details see the section on *New Submissions*.

Figures

Please make sure that figure files are in an acceptable format (TIFF, EPS, PDF or MS Office files) and that the resolution is at least 300dpi. TIFF files may be saved with using LZW compression. *FEBS Letters* reserves the right to decide whether figures will be reproduced in colour in print. For further information on the preparation of artwork, please see <http://www.elsevier.com/artworkinstructions>.

Supplementary material

You have the option to submit supporting data, tables, figures and movies as supplementary material to be published online alongside the electronic version of your article. In order to ensure that your submitted material is directly usable, please provide the data in well-known and common file formats.

When using the 'Your Paper, Your Way' service, supplementary material may be included in the manuscript file upon initial submission.

Electronic artwork

General points

- Make sure you use uniform lettering and sizing of your original artwork.
- Preferred fonts: Arial (or Helvetica), Times New Roman (or Times), Symbol, Courier.
- Number the illustrations according to their sequence in the text.
- Use a logical naming convention for your artwork files.
- Indicate per figure if it is a single, 1.5 or 2-column fitting image.
- For Word submissions only, you may still provide figures and their captions, and tables within a single file at the revision stage.
 - Please note that individual figure files larger than 10 MB must be provided in separate source files

A detailed guide on electronic artwork is available on our website:

<http://www.elsevier.com/artworkinstructions>

You are urged to visit this site; some excerpts from the detailed information are given here.

Formats

Regardless of the application used, when your electronic artwork is finalised, please 'save as' or convert the images to one of the following formats (note the resolution requirements for line drawings, halftones, and line/halftone combinations given below):

EPS: Vector drawings. Embed the font or save the text as 'graphics'.

TIFF: Color or grayscale photographs (halftones): always use a minimum of 300 dpi.

TIFF: Bitmapped line drawings: use a minimum of 1000 dpi.

TIFF: Combinations bitmapped line/half-tone (color or grayscale): a minimum of 500 dpi is required.

If your electronic artwork is created in a Microsoft Office application (Word, PowerPoint, Excel) then please supply 'as is'.

Please do not:

- Supply files that are optimised for screen use (e.g., GIF, BMP, PICT, WPG); the resolution is too low;
- Supply files that are too low in resolution;
- Submit graphics that are disproportionately large for the content.

Reviews and Hypotheses

Reviews and Hypotheses should be topical and of interest not only to specialists in the field but also to the general reader. Hypothesis should present novel ideas or new interpretations of established observations, but should be based on sound data and avoid excessive speculation. Unlike Research Letters and Hypotheses, Reviews do not have a word limit. Prior to submitting a Review or Hypothesis, authors should contact the *Editorial Office* at febs.letters@bzh.uni-heidelberg.de, providing a title, abstract and key references of the article to be considered.

Database linking and Accession numbers

FEBS Letters aims at connecting online articles with external databases which are useful in their respective research communities. If your article contains relevant unique identifiers or accession numbers linking to information on entities (genes, proteins, diseases, etc.) or structures deposited in public databases, then please indicate those entities according to the standards for the respective identifiers. Please use the following format: Database ID: xxx.

Standards of reporting

Authors should comply with available field-specific standards for the preparation and recording of data. We recommend you to refer to the Minimum Information for Biological and Biomedical Investigations (MIBBI) Portal for prescriptive checklists for reporting biological and biomedical research where applicable: <http://mibbi.sourceforge.net/>.

Reviewers

Please submit the names, addresses and e-mail addresses of potential reviewers. You can also specify whom you would like to exclude from reviewing the manuscript. Note that the *Editor* retains the sole right to decide whether the suggested and excluded reviewers are used or not.

Language and language services

Please write your text in good English (British or American usage is accepted). Authors who require information about language editing and copyediting services pre- and post-submission please visit <http://webshop.elsevier.com/languageservices> or *Elsevier's* customer support site at <http://support.elsevier.com> for more information.

MANUSCRIPT SUBMISSION

Initial submission

Submission to *FEBS Letters* proceeds online at <http://ees.elsevier.com/febsletters>. You may choose to submit your manuscript as a single file to be used in the initial peer-review process. For details see the section on *New Submissions*. The system automatically converts your files to a single PDF file.

Submission of a revised manuscript

Upon submitting your revision you are requested to upload the source files of the manuscript, tables, figures and supplementary data separately. A separate file containing point-by-point responses to the original reviewers' comments should also be provided.

For questions on the submission process, please contact the *Editorial Office* prior to submission at febs.letters@bzh.uni-heidelberg.de. All correspondence, including notification of the Editor's decision and requests for revision, takes place by e-mail. For general information about publishing with *Elsevier* see: <http://www.elsevier.com/guidepublication>.

AFTER ACCEPTANCE

Copyright

Upon acceptance of an article, the author(s) will be asked to transfer copyright of the article to the *Federation of European Biochemical Societies*. This transfer will ensure the widest possible dissemination of information. An e-mail will be sent to the corresponding author confirming receipt of the manuscript together with a 'Journal Publishing Agreement' form or a link to the online version of this agreement.

Authors or a third party wishing to reproduce figures, tables or brief quotations from the text of articles published in *FEBS Letters* for non-commercial purposes may do so, providing the original publication is acknowledged accordingly and the authors' approval is obtained. No special permission is needed from *FEBS* or *Elsevier*. If authors or a third party wish to use a major part of an article or an entire article elsewhere, whether in English or any translation, permission must be asked from *Elsevier*, who will if necessary contact *FEBS*, the copyright holder.

Copyright of open access articles is defined by the author's choice of a Creative Commons user license.

For additional information see: <http://www.elsevier.com/copyright>, <http://www.elsevier.com/about/open-access/oa-and-elsevier/oa-license-policy> and <http://www.elsevier.com/permissions>.

Retained author rights

As an author you (or your employer and/or institution) retain certain rights. For details see: <http://www.elsevier.com/authorsrights>.

Proofs

One set of page proofs will be sent by e-mail to the corresponding author. The authors can choose to annotate and correct their proofs directly online or a link will be provided in the e-mail so that authors can download proofs as PDF files. Instructions on how to annotate PDF files will accompany the proofs.

Significant changes to the article as accepted for publication will only be considered at this stage with permission from the *Editorial Office*. Note that Elsevier may proceed with the publication of your article if no response is received within 48 hours.

Page charges

FEBS Letters has no page charges.

Offprints

The corresponding author, at no cost, will be provided with a PDF file of the article via e-mail or, alternatively, 25 free paper offprints. If the corresponding author opts for paper offprints, this preference must be indicated via the offprint order form which is sent once the article is accepted for publication. Additional paper offprints can also be ordered via this form for an extra charge. The PDF file is a watermarked version of the published article and includes a cover sheet with the journal cover image and a disclaimer outlining the terms and conditions of use.

Changes to authorship

Requests to add or remove an author, or to rearrange the author names, must be sent to the *Editorial Office* and must include: (a) the reason the name should be added or removed, or the author names rearranged and (b) written confirmation (e-mail, fax, letter) from all authors that they agree with the addition, removal or rearrangement. In the case of addition or removal of authors, this includes confirmation from the author being added or removed. Any requests to add, delete, or rearrange author names in an already published article will follow the same policies as noted above and result in a corrigendum.

AUTHOR ENQUIRIES

For questions on the submission or reviewing process, please contact the *Editorial Office* at febs.letters@bzh.uni-heidelberg.de. Contact details for questions arising after acceptance of an article, especially those relating to proofs, will be provided by the publisher. You can track accepted articles at <http://www.elsevier.com/trackarticle>. You can also check *Elsevier's Author FAQs*

(<http://www.elsevier.com/authorFAQ>) or contact *Elsevier's Customer Support* via <http://support.elsevier.com>.
