

# Instruction to authors

The **Journal of Environmental Sciences**, an international journal started in 1989 and sponsored by the Research Center for Eco-Environmental Sciences, Chinese Academy of Sciences, is devoted to publishing original, peer-reviewed research papers on main aspects of environmental sciences, such as environmental chemistry, environmental biology, ecology, geosciences and environmental physics. Appropriate subjects include basic and applied research on atmospheric, terrestrial and aquatic environments, pollution control and abatement technology, and conservation of natural resources, environmental health and toxicology. Announcements of international environmental science meetings and other recent information are also included. The objectives are to report on the latest research achievements and developments; to strengthen academic exchanges; to promote cooperation in science and technology; and to contribute to the progress in environmental sciences. The journal's board of reviewing editors consists of 35 members from a variety of scientific disciplines of China, USA, Canada, Japan, UK, Australia and Austria etc.

The journal is abstracted and indexed by SCIE, EI, CC (ISI), CA (USA), PA (USA), Biosis(USA), BA(USA), Federal Agency for Nature Conservation (Germany), NAL Serials(USA), ASTA(USA), IRSD(Japan), WCS of EST(Liechtenstein), Geo Abstracts(UK) and Chinese Sci. & Tech. Journal Abstracts(China) etc.

The journal is distributed in China by Science Press of China (Beijing) and China & Local Post Offices; the international distributing by ELSEVIER

## 1. Type of contributions

Three types of manuscripts are acceptable for publication: **Articles**, **Communications** and **Reviews**.

**Articles** are meant for papers reporting the results of completed definite studies. If several closely related manuscripts are being prepared at about the same time, all should be submitted together. Articles of high scientific quality and originality that are of interest to the wide and diverse readership of the Journal will be given priority for publication.

**Communications** are intended for the rapid and timely publication of original research of significance. Communications are short contributions not exceeding three printed pages in length.

**Reviews** articles deal with topics of current interest in areas relating to environmental sciences. Rather than an assemblage of detailed information with a complete literature survey, a critically selected treatment of the material

is desired. Unsolved problems and possible developments should also be discussed. Review articles are generally written upon invitation of the Chief Editor.

## 2. Preparation of manuscripts

The manuscripts should be organized in a 12pt Times New Roman font with 1.5 line spacing and single column. The text, tables and figures must be in one document. Please read the manuscript sample at the JES website <http://www.jesc.ac.cn>.

The **Title** should clearly and accurately indicate the contents of the Articles or Communications and should be expressed in adequate scientific terms. No abbreviations should be used in the titles.

**Full address** of authors should be placed below the Title.

**An information** should be included on the first page to give the mail address, phone number and e-mail address of the author of correspondence, and if applicable, information regarding funding.

We request that authors should submit **Abstracts** for both Articles and Communications. Abstracts should state briefly the purpose and method of the study, the significant results and conclusions (or recommendations).

Three to eight **Keywords** should be given at the bottom of the abstract to serve as guidelines for indexing.

**Headings:** Articles should be organized under the main headings: Introduction, Experimental, Results and Discussion, Conclusions, and References.

**Tables** and **Figures** must be numbered consecutively with Arabic numerals respectively and should be self-explanatory. Tables should be concise and exact and should use three-lines. Tables must have a brief descriptive title and include footnotes if necessary. Figures should have figure captions, either with the figures or collected on a separate sheet. The contents of figures, tables and word descriptions should not be duplicated.

**Photographs** should be of sufficiently high quality with respect to detail and contrast. Indicate the magnification by a bar on the photograph.

**References** should be arranged alphabetically by author without serial numbering. Reference accuracy is critical and authors are responsible for the accuracy of the references. Only articles that have been published or are in press should be included in the References. Journal articles and books must be cited by the following formats:

Pakker H, Martins R, Boelen P *et al.*, 2000. Effects of temperature on the photoreactivation of ultraviolet-B-induced DNA damage in *Palmaria palmata* (Rhodophyta)[J]. J Phycol, 36: 334-341.

Sheng J R, 1979. Fauna sinica, crustacea, freshwater copepoda[M]. Beijing: Sciences Press.

### **3. Submission of manuscripts**

The Journal of Environmental Sciences has completed a system for online manuscript submission. The authors can visit <http://www.jesc.ac.cn> and contribute the manuscripts online.

### **4. Reviewing of manuscripts**

Every manuscript is independently reviewed by peers. If two or more reviewers consider the manuscript unsuitable for publication in this journal, a statement for the decision will be sent to authors within one or two months of the submitting date. Manuscripts rejected will not be returned to the authors.

### **5. Revision of manuscripts**

A manuscript sent back to an author for revision should be returned to the editor without delay. Returned later than three months will be considered as new submissions.

### **6. Acceptance of manuscripts**

Once the article is published in the journal, a few reprints will be sent to the author free of charge.
