Guidelines for Contributing Authors
All contributing author transactions must be carried out in Elsevier Editorial System (EES): http://ees.elsevier.com/stcvs/. Instructions are located at the end of this document.
The purpose of *Seminars in Thoracic and Cardiovascular Surgery* is to provide the most current information on specific topics. Each article should be of genuine clinical interest and should provide cardiovascular and thoracic surgeons with detailed descriptions and sound evaluations of new methods of diagnosis and treatment, new techniques and scientific and technologic advances, as appropriate to the subject assigned.

Authors are invited by the Editor to prepare a manuscript on an agreed-on topic via Elsevier Editorial System (EES), an on-line manuscript submission and review system. All transactions related to this manuscript must take place via EES.

Your manuscript should consist of the following elements, each starting on a separate page:

- Title page (including Title, authors, corresponding author’s contact information)
- Abstract (150 words) and key words (3 to 5)
- Body of manuscript
- References
- Tables (with permission for re-use, if required)
- Figure legends
- Figures (with permission for re-use, if required)

All parts of the manuscript (including references and legends) should be double-spaced—that is, with a full line of space after every line. Leave generous margins—at least one inch—on both sides and at the top and bottom of every page.

On the **TITLE PAGE**, please include all of the following information:

- The names, degrees, and professional affiliations (position, department, institution, place) of all authors.
- The name of the institution where the work reported was done (“From…”)
- Acknowledgment of grant support when appropriate (“Supported in part by…”)
- A complete mailing address (including U.S. zip code or postal code for other countries) for reprint requests as well as telephone and fax numbers and e-mail address.

**ALL DRUG NAMES** cited in the manuscript should be generic, followed by brand name, manufacturer, city and state in parentheses.
News and Views Articles
Description: Authors are invited to write a paper on a “hot topic” and expand on a recent article found in another journal (NEJM, Nature, Cell, etc.). The goal of this section is to expand on the review in an article that is 5-6 pages in length with a thoughtful analysis with references to support it.

Articles should follow these guidelines:

- 2000-2500 words of text = 3 printed pages
- 30 references = 1 printed page
- 3-5 figures/tables and legends = 2 printed pages

State of the Art Articles
Description: Authors are invited to write a review article on a topic selected by the editor.

Articles should follow these guidelines:

- 3500 words, double-spaced (15 typed pages) = 5 printed pages
- 35 references, double spaced = 1 printed page
- 6 figures or tables = 1 ½ printed pages

Current Readings (2 each for ACD and GTS)
Description: A Guest Author will be selected by the editors and this individual will select 5-6 articles to write about. Each manuscript from the invited author will examine the seminal articles on a topic from the past 2-3 years. The manuscripts will have a short 1-2 paragraph summary with 5 key points as to why it is important to practitioners of cardiac and thoracic surgery and therapies. At the end of each group of manuscripts the Guest Author will provide a synthesis of all the readings along with his own critical review and interpretation of the information. The synthesis can also provide a historical context for the topic, presenting the current reading articles as the newest best information—since xyz (the classic article(s) on a topic) has been published here are the best most relevant articles, showing where we’ve come from to get to cutting edge practice.

Articles should follow these guidelines:

- 2100 words (250 words per page), double-spaced = 3 printed pages
- 6 tables or figures = 1 ½ printed pages—may be re-printed figures/tables from articles covered, with permissions
- 1400 words, double-spaced (Guest Author’s own synthesis of articles) = 2 printed page

Discussions in Cardiothoracic Treatment and Care
Description: Two to four experts in a specific area of interest (anything ranging from surgical techniques, to management, to devices, etc.) will be invited by either Dr. Pass or Dr. Rosengart to have a roundtable discussion via video/teleconference. Dr. Pass/Dr. Rosengart will serve as the moderator of the discussion, though Guest Editors may also be selected for this purpose. Each conference will be audio recorded for transcription, or transcribed live. Once transcripts are prepared, each contributor will have an opportunity to edit his or her portion to be published. The moderator is then in charge of
pulling the edited transcripts together into an article and they will have final formatting, editing, and review of the published product as their responsibility.

**Estimating Manuscript Length**

We ask for your cooperation in keeping within our page limitations for each issue of the journal. Please refer to the first page of these guidelines for the requested length of your manuscript. The following approximations are offered to help you calculate length:

- Three 8 1/2 x 11 pages, double-spaced with 1.5-inch margins, in standard 10- or 12- point word processor type (approximately 250 words per page) = 1 printed page
- 35 references (all lines double-spaced) = 1 printed page
- 4 tables or figures with legends = 1 printed page

Example: A manuscript contains 15 pages of text with 17 references and 6 tables:

- 15 pages of text = 5 printed pages
- 17 references = 1/2 printed page
- 6 figures or tables = 1 1/2 printed pages

**References**

Discoverability of research and high quality peer review are ensured by online links to the sources cited. In order to allow us to create links within ScienceDirect and to abstracting and indexing services, such as Scopus, CrossRef or PubMed, please ensure that data provided in the references are correct. Please note that incorrect surnames, journal/book titles, publication year and pagination may prevent the link creation. When copying references, please be careful as they may already contain an error.

There are no strict requirements on reference formatting at submission. References can be in any style or format as long as the style is consistent. Author(s) name(s), journal title/book title, chapter title/article title, year of publication, volume and issue/book chapter and the pagination must be present. The reference style used by the journal will be applied to the accepted article by Elsevier at the proof stage. Note that incorrect or missing data will be highlighted at proof stage for the author to correct.

If you do wish to format the references yourself they should be arranged according to the following examples:

*Journal article, one author:*

*Journal article, two or three authors:*

Journal article, more than three authors:

Journal article in press:

Complete Book:

Chapter of book:

Book that is a new edition and is volumes:

Chapter of book that is part of published meeting:

Paper presented at a meeting:

Journal article in journal that is a supplement:

Abstracts:

Editorials:
Tables and Figures

All tables and figures must be cited in the text.

TABLES are numbered with Arabic numerals (Table 1, Table 2) in the order of their citation in the text. Each table should be typed (double-spaced throughout) on a separate page and should have a title. Maximum table width: 144 characters (i.e., letters and spaces). Use spaces, not vertical rules, to separate columns. Abbreviations should be explained in a footnote.

FIGURE LEGENDS are also numbered with Arabic numerals (Fig 1, Fig 2). Legends should be typed double-spaced on a separate page, not attached to the illustrations themselves. Legends should be sufficiently detailed to allow understanding without reference to the text.

FIGURES

- Figures should be submitted (uploaded to EES) in electronic format: Maximum width of figures after reduction: 6 inches. Images should be provided in EPS or TIF format (for those mailed to the Editorial Office, on CD).
- Graphics software such as Photoshop and Illustrator, not presentation software such as PowerPoint, CorelDraw, or Harvard Graphics, should be used to create art.
- Gray scale images should be at least 300 dpi.
- Line art (black and white or color) and combinations of gray scale and line art should be at least 1200 dpi.
- For best reproduction, screening, shading, and lettering on a dark background should be avoided.

The author should retain negatives of halftones and one complete set of all figures. Photocopied figures or authors’ sketches are not suitable for reproduction in the journal (however, photocopies are acceptable as duplicate copies).

Color prints are not acceptable for reproduction as black and white prints. If the author wishes to include color figures, the cost of color plates must be borne by the author. We can provide estimates for this option. Please include any specific instructions about the sizing, magnification, or layout of photomicrographs.

Supplementary Multimedia Files

See Multimedia Supplements at the end of this document.

Permission to Reprint
For any materials that have been borrowed from another copyright holder, authors are responsible for applying to the original copyright holder for permission to reprint in both print and electronic versions. A sample Permission Request Form is attached. Authors must submit copies of letters granting permission with the submitted manuscript. All reprinted figures and tables should be accompanied with the line “Reprinted with permission” followed by the appropriate reference number (e.g., “Reprinted with permission 23”). Authors are responsible for bearing any costs associated with granting print or electronic rights.

Be cautioned not to submit the same figure or table simultaneously to two publishers on the assumption that one article will publish before the other and that the publisher of the first article will grant permission for reuse of the material. Publication of one article may be delayed unexpectedly, necessitating withdrawal of material from the other article.

**Deadline**

It is of utmost importance to submit your manuscript, complete with all figures and tables (and written permission to reproduce them when required) by the assigned deadline (see first page of guidelines). This deadline allows the Guest Editor time to review your manuscript and forward it in time for prompt publication. It also allows time for any revisions to your manuscript should they be necessary.

**Proofreading**

The corresponding author is sent first proofs via e-mail and is asked to proofread them for typographical errors and return them to the publisher within 48 hours. Important changes in data are accepted, but authors are charged for excessive alterations in proofs.

**Copyright**

Authors contributing a manuscript do so with the understanding that, once it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms of media now and hereafter known, shall be assigned exclusively to the publisher. The author will be asked to sign a copyright release form to this effect.

**Conflict of Interest Disclosure Policy**

*Seminars in Thoracic and Cardiovascular Surgery* requires authors of all articles to disclose any conflict(s) of interest. If an author of an article has a financial relationship with one or more companies whose products are featured in the article, the AATS and its designees will resolve the conflict prior to utilization of the article and the nature of the relationship will be disclosed on the first page of the published article. The absence of any declaration of a conflict of interest indicates that none exists. Authors who violate our disclosure policy will be denied the privilege of publishing their work in any AATS journal for one to two years, depending upon the severity of the offense.
Questions
If you have any questions related to the content or organization of your manuscript, please contact your Editor:

Checklist for Submitting Manuscripts

_____ Manuscript file uploaded to EES (http://ees.elsevier.com/stcvs/)

_____ Title page including
    ____ Title of manuscript
    ____ Complete names, academic degrees, departments, and professional
        affiliations of all authors
    ____ Full name, address, telephone and fax numbers, and e-mail address of
        corresponding author

_____ Abstract and index words on a separate page

_____ Text, double-spaced

_____ References in order of citation, double spaced (not alphabetical order)
    (NOTE: Please refrain from using end notes for references. Simply type reference numbers
    with parentheses and type the reference list.)

_____ Figure legends, double spaced
_____ Tables, with titles, each on a separate page

_____ Separate electronic file of each figure (do not imbed figures in text file)

_____ Supplementary multimedia material, appropriately marked

_____ Permission from copyright holders to use previously published materials and
    from institutions to use forms, protocols, etc.

_____ Informed consent for patient photographs

_____ Signed disclosure information for all authors
NOTE: Authors are requested to keep a copy of their manuscript!
Guidelines for Preparing and Submitting Electronic Files

General Submission Requirements
- Upload only the final version of the manuscript approved by the editor.

File Organization
Please make sure the text of your manuscript is in the following order:

- Title Page
- Abstract and keywords
- Main Text
- Acknowledgement
- Appendix
- References
- Figure Legends
- Tables

Note: Do not import the Figures into the text file.

Please refrain from using end notes for references. Simply type reference numbers with parentheses and type the reference list.

Figures
For most types of figures TIFF or EPS files are the preferred format. The resolution for line art must be at least 1000 dpi; photographs and shaded drawings must have a finished resolution of 300 dpi. A hard copy of the figure must accompany each file.

Please do not submit Microsoft Word documents with embedded images. All image files must be separate files. The following file formats are not acceptable because they are low resolution: PowerPoint, JPG, GIF, ONG, PCX, PNG, XBM, and Excel.
Document Formatting

Typographical formatting is handled by the publisher. This pertains to the design specifications for the final printed product, such as column widths, page depths, and type styles. Please refrain from using this type of formatting.

Editorial formatting may be included in the disk file. This refers to attributes such as italics, superscripts, subscripts, and Greek letters. The coding scheme for each such element must be consistent throughout the file.

Text Style

- Type text flush left (i.e., do not indent paragraphs) in upper/lowercase letters as appropriate.
- Enter only one space between words and sentences.
- For line breaks within a paragraph, use the automatic “wraparound” feature of your work processor (also referred to as “soft return”); do not use the carriage return (or “hard return”).
- Use two hard returns at the end of each paragraph (i.e., one blank line should appear between paragraphs).
- Use two hard returns between headings and text.
- Do not use the word processor’s indenting or margin setting features. (These will be handled during typesetting.)
Multimedia Supplements

Supplementary files will be published online alongside the electronic version of your article.

Supplementary and/or multimedia files should be referred to (from the text) in the same way as for figures and tables. (E.g., "...see Movie 2...or E Figure 1").

Any supplementary material that is not directly referred to from within the text of your manuscript should be referred to via use of a footnote to the article title.

Please provide a short description for each supplementary file supplied. When published online, the descriptive texts will appear as captions alongside links to the relevant supplementary files.

Supplementary movies or animation files should be provided in one of the formats listed in the table below:

<table>
<thead>
<tr>
<th>Format</th>
<th>Extension</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>MPEG</td>
<td>.mpg</td>
<td>• Preferred movie format&lt;br&gt;• MPEG-1 or MPEG-2 format required&lt;br&gt;• Highest possible quality required</td>
</tr>
<tr>
<td>Apple QuickTime</td>
<td>.mov</td>
<td>• Acceptable movie format&lt;br&gt;• Highest possible quality required</td>
</tr>
<tr>
<td>Microsoft Audio/Video Interlaced format</td>
<td>.avi</td>
<td>• Accepted movie format&lt;br&gt;• Highest possible quality required</td>
</tr>
<tr>
<td>Compuserve GIF</td>
<td>.gif</td>
<td>• Preferred format for animation of rasterised (pixel-based) images&lt;br&gt;• Highest possible quality required</td>
</tr>
</tbody>
</table>

NOTE: To ensure that they can be easily downloaded, movie files cannot exceed 10 MB.

Supplementary image files should be provided in one of the formats listed in the table below:

<table>
<thead>
<tr>
<th>Format</th>
<th>Extension</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>Compuserve GIF</td>
<td>.gif</td>
<td>• Preferred format for max. 256 colour bitmap and greyscale images</td>
</tr>
<tr>
<td>JPEG</td>
<td>.jpg</td>
<td>• Preferred for 16 million colour photographs and other high-quality artwork involving halftones</td>
</tr>
<tr>
<td>Scalable Vector Graphic</td>
<td>.svg</td>
<td>• Preferred format for vector-based images</td>
</tr>
<tr>
<td>Portable Network Graphic</td>
<td>.png</td>
<td>• Allowed image format, should be converted to a preferred format if</td>
</tr>
<tr>
<td>Tagged Image File Format</td>
<td>.tif</td>
<td>• Allowed image format, should be converted to a preferred format if possible</td>
</tr>
<tr>
<td>--------------------------</td>
<td>------</td>
<td>------------------------------------------------------------------</td>
</tr>
<tr>
<td>Encapsulated PostScript</td>
<td>.eps</td>
<td>• Allowed image format for vector-based images</td>
</tr>
</tbody>
</table>

For more detailed information about requirements for supplemental multimedia items, go to [http://authors.elsevier.com/home.html](http://authors.elsevier.com/home.html) and click on “Artwork Instructions” in the gray box on the right side of your screen.

---

Your cooperation in complying with these guidelines will expedite the production process. Whenever feasible, the publisher will use the electronic version of the manuscript. Please note that disks will not be returned to the authors.
Permission Request Form

From: __________________________  Date: __________________________

Dear Permissions Coordinator:

I am preparing for publication an article entitled:

To be published in:

I hereby request your permission to reprint the following material:

Author/Editor: __________________________

Title of book or article: __________________________

Journal, Volume, and Issue (if applicable): __________________________

Material to be reproduced: __________________________

Page numbers: __________________________

Permission is sought to reprint the above mentioned material in all forms and media now or hereafter known, in all languages, throughout the world and to license such rights to others.

Sincerely,

I/We hereby grant permission to reprint the material(s) requested above:

STCVS Disclosure Statement ~ E-mail: stcvs@aats.org ~ Fax: 978-524-8890

In the interest of unbiased scientific reporting, our primary obligation to our readers, the Editors of the journal *Seminars in Thoracic and Cardiovascular Surgery* require all authors to fully disclose all direct or indirect financial relationships, including any relationship of the authors or their immediate family, that would lead a reasonably well informed person to believe that the authors’ work could be affected by their private interests. If the Editors deem the information of significance, they will disclose the relationship on the title page of the manuscript. Please add a separate sheet for any information that does not fit on this page. [Please print.]

Name: ________________________________  Manuscript title or number: ________________

Does your manuscript describe a product or service from which increased sales would in any way benefit you or any member of your immediate family? If so, please indicate how:
______________________________________________________________________________

______________________________________________________________________________

List companies from whom you or any member of your immediate family received fees for consulting or serving on advisory boards (per year, for the past 2 years or the known future)

<table>
<thead>
<tr>
<th>Company NAME</th>
<th>None</th>
<th>&lt;US$10,000</th>
<th>&gt;US$10,000</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
